

Recommended Pre & Post Care for Wart Treatments

For best results please follow these instructions

Before your treatment:

- Area to be treated should be clean of all lotions.
- Do not use any topical wart treatment 1 week prior to treatment

After your treatment:

- Warts usually develop a black or crusty appearance 24-48 hours after treatment
- Treated warts usually slough off within 1-4 weeks
- The treated area may feel bruised for a few days
- Cold compress may be applied
- A blister may develop
- Notify clinic if you notice an increase in redness, pain, and swelling or if a pustule appears (like pimple)
- A bandaid and triple antibiotic ointment may be applied
- More than one treatment may be required, call the office once the black areas come off for further evaluation. It is important this is done soon after the black are falls off.
